

## NEW RANGE OF EXHAUST MANIFOLD STUDS & NUTS NOW AVAILABLE

Connect Workshop Consumables have introduced a new range of engine manifold studs and nuts suitable for both inlet and exhaust manifold made up of the most common **M8** and **M10** sizes. The studs are threaded at both ends with the outer/longer thread able to be cut to length where the application requires it to be adapted.

A selection of 12 sizes of engine manifold studs and 2 types of nut in **M8** and **M10** sizes are supplied in a mixed set, with individual top up packs available for each part.
