

Window Winder Handle Remover

Trim clip tool suitable for the removal and installation of the window handle retainer clips, situated behind traditional window winder handles, without causing damage to the handle or surrounding trim. Enables the "C" type clip to be gently pushed back allowing for the handle to then be pulled off the spigot. The handle end of the tool can then be used to push the clip back on once the handle has been re-installed.

Additional Information

- Ideal for use on older and classic cars.
- Safely removes the winder handle retaining clip.
- Allows the handle to be removed or repositioned.
- Avoids damage to the fascia panel.
- Specialist bodyshop tool.
