

Oil Filter Strap Wrench - to 300mm dia

Strap style filter wrench for soft gripping and removing oil filters, up to 300mm diameter, making it ideal for removing larger engine filters. The twin head adjuster has a 21mm Hex profile for spanner adjustment and a choice of 1/2"D and 3/8"D for easy tightening with a ratchet or power bar. The compact design can be rolled up for easy storage, a simple, cost-effective solution for removing stubborn oil filters.

Additional Information

- Strap filter wrench for the removal of oil filters, up to 300mm diameter, ideal use on larger engines.
