## LASER®

## **Dial Test Indicator - DTi**

A precision tool for accurate measurement of depth for example finding the Top Dead Centre (TDC) on diesel engines.

## **Additional Information**

- DTi with 41mm diameter x 0-8mm x 0.01mm. Thread size: M2.5 x 0.45.
- · Precision measurement of depth. Accurate to 0.01mm
- For checking the TDC on diesel engines.
- · Also useful for checking run out on brake discs, etc..
- Mounts directly onto the TDC Indicator (Part No. 4151) to give an accurate reading for TDC.
