

Injector Removal Kit - for VAG

This tool kit assists the removal and installation of the high pressure petrol injectors used on direct injection VAG engines. Designed to help prevent damage to the injectors.

Additional Information

- Kit includes: double jaw puller, U-shaped puller, slide hammer, tapered tool and sleeve, 2 x seal adaptors and injector installer.
- Tools are also included for the installation of the injector seals - important to ensure a good seal.
- Equivalent to OEM T10133.
- Manufactured from Chrome Molybdenum, carbon steel & brass.
- For later models please see our uprated kit, Part No. 8274.
