

Oil Filter Wrench 60mm - 105mm

A long handled, adjustable chain oil filter wrench, ideal for accessing confined spaces. The double-link chain construction provides plenty of strength and grip, even on oily surfaces and it will fit canister-type filters from 60 – 105mm diameter. The handle is 350mm long, perfect for extra leverage when removing stubborn filters and the cranked swivel design is useful when access is restricted. All-in-one wrench and handle design, unlike traditional chain wrenches there is no need for a separate ratchet or power bar, a really useful tool for the automotive workshop.

Additional Information

- Adjustment range: 60 - 105mm.
- Double-link chain construction for extra strength and grip.
- For the removal of canister-type filters.
- Long handle, 350mm for extra leverage.
