

Oil Filter Wrench 1/2"D - 64.5mm x 14 Flutes

A cup style oil filter wrench specifically designed for use on Toyota models. Six additional fins help drive the wrench when removing or refitting the plastic oil filter housing.

Additional Information

- Applications: most Toyota models fitted with 1800cc and 2000cc engines, including Avensis, Corolla and Prius.
- Size: 64.5mm x 14 flutes x 1/2"D with 21mm Hex.
- To be used with either a 1/2"D ratchet or a 21mm spanner.
- Manufactured from steel, which reduces the chance of damage to the housing whilst still allowing it to withstand the additional torque required in loosening filters if stubborn or previously overtightened.
