

Butane Heating Torch

A robust heat torch designed for use with standard self sealing butane gas cartridges. The torch has a gas regulator control knob for precise flame adjustment and a sturdy thumb button on/off switch for easy operation. Automatic piezo electric ignition ensures the torch is easy to light from any angle. A good quality, reliable torch ideal for a wide range of heating, soldering and repair jobs round the workshop.

Additional Information

- Butane cartridge heat torch with angled grip for ease of use.
- Centrally mounted gas regulator control wheel for precise flame adjustment. Temperature range up to 1300°C.
- For heating, soft soldering & brazing. Ideal for use with Laser Aluminium Repair System, Part No. 4707.
- Piezo ignition allows torch to be lit at any angle.
- NOTE: Uses self sealing threaded butane gas cartridges, not included.
