

Rotary Barrel Pump - AdBlue[®]

A hand operated rotary barrel pump specifically for use with AdBlue[®]. Fits drums or barrels (from 23 - 230L / 5- 55 gallons) with 2" BSP opening.

Additional Information

- Designed for use with AdBlue[®], but also suitable for water, diesel, oil, weak acid/alkali liquid.
- Easy hand rotating operation pumps 0.3 litres per revolution. Inlet tube length: 1000mm; diameter: 20mm.
- Supplied with a 2" BSP fitting. To convert fitting for 205L drum, please use Laser Lever Pump Thread Adaptors, Part No. 60532 or 7621.
- Manufactured from composite material specifically to reduce the staining from AdBlue[®].
- If Pump fails to pump after being left for some time run distilled water through and continue. To prevent this, please pump water through before storing.
