

Engine Timing Tool Kit - for PSA, Fiat

This kit provides the tools required to set the valve timing on the extensive range of DW10 and DW12 diesel engines found in the PSA and Fiat ranges.

Additional Information

- The DW10 engine range has a 2.0 litre capacity (from 1999) and can be either single or double overhead cam.
- The twin cam systems have one camshaft driven by the cambelt and the other camshaft driven by a chain linking the camshafts in the head.
- The DW12 range is 2.2 litre (from 2001).
- A pulley holding tool, such as Part No. 2869, may be required to change the chain.
- Made in Sheffield.
