

Crows Foot Wrench Set - for Ducati

A pair of crows foot wrenches designed to fit Ducati cylinder head nuts. Applications are extensive with M14 being used on post 2005 machines and M15 used on 2002 to 2005 machines. The wrenches are specifically designed to be used with a 1/2"D torque wrench allowing tightening of the head nuts even with the engine in the frame. NOTE: Not designed for applications requiring over 75nm of torque. For removal of the head bolts, a suitable standard spanner must be used to initially slacken the nuts.

Additional Information

- To allow the correct torquing down of Ducati 14mm and 15mm cylinder head bolts.
- Size: 14mm/15mm in Bi-Hex (12 point) to give improved access. Fits both single and double Hex nuts.
- Equivalent to OEM 88713.2676 (14mm) and 88713.2096 (15mm). Use in accordance with OEM instructions.
- Sold as a pair and can be used with 1/2"D torque wrench. MAX. Torque: 75Nm.
- Made in Sheffield.
