

Clutch Basket Holding Tool - Motorcycle

This adjustable motorcycle clutch holding tool has been designed to clamp onto the outer gear of the inner hub to prevent it from moving. This then allows you to undo the centre clutch fixing, which will then enable you to remove the clutch basket or the inner hub itself.

Additional Information

- Clamps onto the clutch bucket outer gear.
- Adjustable for a wide range of motorcycles.
- Jaws adjustable with screw thread.
- Soft grip handles.
- Max opening: 120mm.
