

Steel Tie Gun

Heavy duty steel tie gun for steel banding installation, as used on CV and steering boots. Ensures steel ties are correctly tensioned and properly finished. Press ratchet action for precise tightening with speed and consistency. Spring handled design with plastic moulded grips for comfort and ease of use. Flush cutting jaw head with side mounted cutting lever for a neat, professional finish.

Additional Information

- Professional steel tie gun for manual tensioning and fixing of metal cable ties, including fixing CV & steering boots.
- Side mounted cutting lever for ease of use.
- Manufactured from heavy gauge steel with a durable powder coated finish.
- Spring loaded handles for control & precision.
- For use with steel cable ties up to 0.3mm thick & 12.3mm wide, such as Connect stainless steel cable ties, Part No. 30307.
