

Motorcycle Fork Spring Compressor

This motorcycle fork spring compressor has been designed for use on both Triumph and Ducati motorcycles. Essential for the assembly and disassembly of an upside down (USD) fork by relieving the spring tension and allowing access to the top cap lock nut.

Additional Information

- Designed to compress the fork springs to allow access to the top cap lock nut, for assembling and disassembling.
- Equivalent to both Ducati OEM 887130957 and Triumph OEM T3880067.
- Simple screw in pins (8mm diameter) for location on the spring top spacer.
- Manufactured from carbon steel (S45C) & steel, with a black phosphate finish.
- For hands-free operation, Laser Motorcycle Fork Spring Compressor Part No. 5267 is recommended.
