

Brake Fluid Boiling Point Tester

The Laser Brake Fluid Boiling Point Tester performs a boil test on a sample of fluid taken from the vehicles system and gives a clear indication of the boiling point and therefore an indication of the serviceability of the fluid.

Additional Information

- Identifies the boiling point of any brake fluid sample.
- Powered from the vehicles own battery.
- Clear and accurate digital read out.
- The accuracy and calibration of 6802 can easily be checked by testing in clean water.
- Sampling syringe and glass sampling container included.
