

Fuel Injection Pump Sprocket Locking Tool - for Ford

Designed to allow the removal of the chain driven high pressure diesel injection pump without removing the timing chain or disturbing the engine timing.

Additional Information

- Applications: 2.2 and 3.2L TDCi Duratorq engines (from 2006).
- Engine found in: Ford Transit and Ranger.
- Equivalent to OEM 303-1317.
- Use with Ford OEM tools 303-679 (found in Laser Tools Part No. 6191) and 303-249 (found in Laser Tools Part No. 5825).
- Maintains engine timing and timing chain position while permitting removal of the fuel pump.
