

High Voltage Tester CAT IV 1000V

A high voltage, CAT IV 1000V, tester for checking the high voltage systems found on electric and hybrid vehicles.

Additional Information

- Voltage tester to check for the existence and/or absence of high voltage on hybrid or electric vehicles (EV's).
- CAT IV 1000V suitable for both DC and AC voltage testing: 6-1000V DC and 24-1000V AC.
- LCD display resolution to 1V. Bar graph displays voltage range 6, 12, 24, 50, 120, 230, 400, 690 and 1000V.
- Includes a self-test function and illumination light, also checks DC voltage polarity and continuity.
- EN61243-3, IP65, CE & UKCA compliant. Requires 2 x AAA batteries.
