

Mini Torque Multiplier 3.4 to 1

Small lightweight mini torque multiplier 3.4:1, with maximum torque of 450Nm (332lb-ft) and rubber covered reaction bar for wheel protection.

Additional Information

- Suitable for motorcycle wheel fixings, engine pulley bolts and drive flange bolts etc.
- Input 3/8"D, output 1/2"D. Weight: 710g.
- Max output torque 450Nm (332lb-ft); max input 130Nm (95lb-ft). Tolerance +/-5%.
- Manufactured from Chrome Molybdenum with a Chrome Vanadium drive & Polyethylene (PE) grip.
- Includes torque input / output ratio calculation table.
