

Brake Pipe Bending Pliers

Brake pipe bending tool for 3/16" and 1/4" brake and fuel lines, designed for brake pipe servicing and maintenance work. The specialist pliers have a grooved head profile which hold pipes safely and securely for kink-free bending and the long comfort grip handles provide plenty of leverage. A simple and effective tool for custom pipe fabrication.

Additional Information

- Specialist brake pipe bending pliers for bending 3/16" and 1/4" brake and fuel lines.
- Grooved plier head holds pipe securely for smooth bending without risk of damage.
- Dipped handles for improved comfort and grip.
- Long handles provide additional bending leverage; handle length: 200mm, overall tool length 240mm.
- For use on most types of tubing including copper, cupronickel, stainless steel & soft metal tube.
