

Camshaft Installation & Timing Tool Set - for Volvo, Ford

The 7127 is an engine timing and cylinder head rebuild kit for the popular Volvo 2.5 and Ford 2.5 ST petrol engines. It contains the tools required to align the crankshaft and camshafts, along with the tools needed to hold the camshafts in the top half of the cylinder head and the press tools required to fit the cam carrier, with cams, into the head making re-assembly much easier and faster.
