

Fuel Line Disconnect Set - Difficult Access

Most traditionally designed disconnect tools of this type require 360 degree access to the connector. This difficult access set is designed to give access where 360 degree access is not available allowing for easy disconnection of connector close to bends or close to the fuel filter top.

Additional Information

- Applications: Chrysler, Fiat, Ford, Jeep, VAG, Vauxhall/Opel and Volvo.
- Design allows use on connectors that are close to a sharp bend (e.g. fuel filter top pipes).
- Designed for use in areas of difficult access.
- Saves time when replacing fuel filters.
