

Cam Belt Pre-Tension Tool - for VAG

Used to tension the camshaft drive belt on the 1.2 & 1.4L VAG twin cam engines from 2013, to ensure all the slack in the belt is removed prior to tightening the camshaft pulleys.

Additional Information

- Applications: VAG vehicles fitted with 1.2L & 1.4L engines, including Volkswagen Golf & Audi A3 (from 2013).
- Equivalent to OEM T10487.
- For engine timing tools, please see Laser Part No. 6586.
- Use in accordance with OEM instructions.
