

Cylinder Liners Extractor Tool

Designed specifically for removing the cylinder block liners from "wet liner" type engine blocks. Also known as 'engine cylinder sleeve puller' or 'wet sleeve extractor'.

Additional Information

- Fully adjustable puller attachment covering cylinder diameters from 60mm to 160mm.
- Wet cylinder liner engine designs can be found in motorcycles, cars, heavy goods vehicles, agricultural engines, boats and aeroplane engines etc.
- Wet cylinder liners can be found in vintage, classic and modern engines.
- Manufactured from carbon steel.
- Pulling force provided by force screw. NOTE: Not for use with power tools - hand tool use only.
