

Sheet Metal Nibbler - Cordless Drill Attachment

Sheet metal nibbler drill attachment for cutting sheet metal with a cordless drill. The nibbler can cut sheet steel up to 1.0mm thick and stainless steel 0.8mm thick, with a smooth cutting action that leaves the surrounding metal undistorted. The precision head cuts tight radius curves, intricate shapes and straight lines accurately and the lightweight aluminium body and composite handle make it easy and comfortable to use. A versatile tool for auto body repair and cutting corrugated sheet material, and an excellent alternative to hand tools or a dedicated nibbler.

Additional Information

- For cutting sheet steel 1.0mm thick and stainless steel 0.8mm thick.
- For use with cordless drills with Hex drive for quick chuck connection. Cutting RPM: 2000 - 3000rpm (max).
- Robust aluminium body and rubberised composite grip.
- Lubricate moving parts with light machine oil.
- Spare nibbler punch bit available - please see Laser Part No. 61230.
