

Two Pole Voltage Tester 12 - 600V

Two pole voltage tester 12 - 600V DC/AC CAT III. Designed to be used to prove the absence or presence of voltage in a circuit before and after working on the circuit. Can be used on circuits up to 600 volts found on hybrid and battery electric vehicles.

Additional Information

- Two pole voltage tester. Used to prove absence &/or presence of voltage on hybrid and battery electric vehicles.
- CAT III 12 - 600V DC/AC with LED display.
- Simple and easy to use; no batteries required.
- Always perform self test on known voltage source before use.
- CE & UKCA compliant; GS certified.
