

Thread Chaser M14 x 1.25mm – Spark plug & BMW MINI

A 3/8" drive spark plug thread chaser designed to clean and restore spark plug bore threads. Low, narrow profile and longer length makes it ideal for hard to reach areas. It can also be used to clean and repair damaged wheel bolt holes on BMW and MINI models from 2013 onwards. Manufactured from chrome vanadium with manganese phosphate coating for corrosion resistance.

Additional Information

- Applications: Used to clean & repair damaged spark plug bore threads in engine blocks, together with wheel bolt holes of BMW & MINI models (from 2013).
- Size: M14mm x 1.25mm spark plug threads x 3/8"D. Outside diameter: 17mm.
- Extra long shank (70.5mm) for cleaning deep-set plug sockets. Low, narrow profile for use in limited access areas.
- Manufactured from chrome vanadium with manganese phosphate coating for corrosion resistance.
- M14 thread cleaner (chaser) with integrated seal seat milling tool also available, please see Laser Part No. 8083.
