

Spark Plug Connector Pliers

Twin joint spark plug connector pliers designed for the safe removal of deep seated, difficult to access spark plug connectors. Featuring a clever double-jointed closing mechanism, the handles do not have to open far to grip, for easy, one-handed operation even in tight locations. The angled gripper jaws can remove or insert plug connectors with ease and the handles have a non-slip rubber coating to provide excellent grip. A professional pair of pliers designed to make spark plug servicing quicker and easier.

Additional Information

- Extra long spark plug connector pliers allows access to deep seated spark plug connectors.
- Double joint mechanism requires less space to operate.
- Angled, gripper head for ease of removal and insertion of spark plug connectors, even when the engine is warm.
- Jaw opening: 12.7mm to 60mm diameter. Extra long reach tool (340mm long) to access deep seated sockets.
- Manufactured from low carbon steel (SS400) with PVC grips.
