

Test Probe Kit - Slim Fit

Two multimeter test probes supplied with removable tip covers. They are designed for areas with restricted access where standard width probes may struggle. Designed to be used with 4mm banana style test cables.

Additional Information

- Levels of protection are: CAT III 1000V (cap fitted), CAT II 1000V (cap removed).
- Equipped with 4mm banana plug socket to work with 4mm banana plug leads. Recommended for use with 4mm banana socket equipped test leads.
- Length: 120mm. Ergonomic shape with fingertip protector.
- Ideal for use with multimeters and insulation tester. Extra slim design for better access in tight spaces.
- Use with Laser Electrical Test Leads (Part No. 6543) for use with Laser High Voltage Insulation Tester CAT III (Part No. 6549) and Laser Insulation Resistance Multimeter (Part No. 6550)
