

Spring Band Clamp Locking Tool Set 3pc

Spring band clamp locking tool set allows the technician to keep spring type fuel or coolant hose clips open while working without having a bulky set of pliers in the way.

Additional Information

- Spring clip holding tools 3 size apertures: 4mm, 9mm & 12mm.
- Designed to hold open spring type clips found on fuel lines, vacuum and coolant pipes. Spring clips opened with pliers & clamp tool easily inserted to hold clip open, freeing up hands & pliers for the next clamp.
- Simple operation: Open the spring clip with pliers and slide the appropriate holding tool into place. Remove pliers. The clip stays open leaving the mechanics hands free to work.
- With the clip holding tool in place, the clip can easily be positioned by hand without fear of trapped fingers and the use of bulky pliers.
- Eyelet doubles as handle and a place to tie a ribbon, string or tie wrap to make finding the tool easier if dropped.
