

Fuel & Additive Funnel - Petrol

A fuel and additive funnel for use on petrol vehicles fitted with anti-misfuelling flaps, with a long neck design that opens the internal flap to allow emergency refuelling or the addition of fuel additives. The funnel is manufactured from tough polypropylene and there is a notch in the rim designed to fit fuel additive bottles for easier filling. A useful funnel to keep in the car in case of emergencies.

Additional Information

- Outlet diameter: 21mm. For petrol fuel filler only.
- For emergency fuelling or adding fuel additive.
- Manufactured from polypropylene (PP) plastic.
- Angled, notched, anti-splash rim for easier filling. Total funnel length 165mm.
- Fuel and additive funnel also available for diesel cars, please see Laser Part No. 8021.
