

JIS Pound Thru Screwdrivers 3pc

A set of three pound thru screwdrivers sized to fit Japanese Industrial Standard (JIS) screws. Precisely engineered cross-point JIS head for an accurate fit, prevents cam-out and screw damage when working on Japanese branded motorcycles & cars. The pound thru design allows the driver to be struck with a hammer to help release seized fixings. A high-quality set, the Hex shaft continues through the handle for excellent impact resistance and the soft grip handles are clearly printed with the driver size for easy identification.

Additional Information

- Japanese (JIS) cross-point head. Sizes: PH1 x 75mm, PH2 x 100mm, PH3 x 150mm.
- Pound thru design can be struck with a hammer to release the fixing before and during application of torque.
- Hex shaft continues through handle for strength & impact resistance.
- Manufactured from Chrome Molybdenum with magnetic tips, with Polypropylene (PP) & Thermoplastic rubber (TPR) handles.
- From a range of JIS tools. Please see Part Nos. 7036 (screwdriver set), 7520 (T-handle bit), 7724 (Impact bit set).
