

## Track Rod Adjusting Wrench

Track rod adjusting wrench suitable for adjusting track rods as well as for general use.

### Additional Information

- Pipe wrench type design with quick fit spring loaded jaw.
- Long 18" (457mm) handle for greater leverage with 10mm - 35mm jaw adjustment range.
- Serrated jaws help prevent slippage and damage to track rods.
- Spring loaded drop-forged jaw for strength.
- Manufactured from heat treated carbon steel (55), with a rubber grip handle.
