

Oxygen Sensor Socket 1/2"D 22mm

This short series Oxygen sensor socket is used for the removal and installation of Oxygen or Lambda sensors. It features a slot in the side, enabling it to be fitted over the wiring harness, and can be driven by both a 30mm spanner and 1/2"D socketry making it ideal for both difficult access situations or for when increased torque is required to undo tight or seized sensors.

Additional Information

- Short series - length: 70mm.
- To fit 22mm single Hex Lambda (oxygen) sensors.
- The combination of open wrench and 1/2" drive ratchet allows for the application of increased torque.
- Can be driven by 1/2" square socketry or 30mm spanner depending on access.
- Manufactured from chrome molybdenum with black phosphate finish.
