

Long Lasso Pick Up Tool

Lasso pickup tool with a non-magnetic, loop grip, suitable for picking up components made from any material, including non-ferrous. Extra-long reach with an operating length of 1700mm and a semi rigid outer cable sheath for accurate control of the lasso. Pull handle mechanism provides a secure grip, once closed onto a component or tool the lasso will not easily slip off. Ideal for picking up tools, components, keys etc. in restricted areas, where conventional pick-up tools fail.

Additional Information

- Pull handle lasso mechanism for a secure grip.
- Semi rigid cable for precise lasso control.
- Open diameter of loop: 40mm; sheath diameter: 9mm.
- Operating length: 1700mm.
- Ideal for picking up items in restricted areas, where conventional pick-up tools fail.
