

Workshop EV Package with Mobile Shadow Board Kit

A complete package of tools, PPE & safety products for workshop use, when servicing or repairing high voltage vehicles. Supplied on a mobile shadow board for ease of access & security.

Additional Information

- An 88pc package of all necessary safety requirements for working on vehicle systems up to 1000v, stored conveniently on a shadow board & mounted on a mobile trolley for ease of movement around workshops and/or bodyshops.
- High visibility ensures nothing can accidentally go missing, & forms part of a safety management process, essential when working on high voltage systems, where there is greater risk of accidental injury to employees.
- Contents : insulated tools & test instruments, high voltage PPE (insulated gloves & face shield), high voltage signage & safety barriers, lock-out procedure safety products, insulated floor matting & shrouding for added safety, rescue pole & electric shock first-aid poster.
- Shadow board is mounted on a stainless steel frame & mobile trolley with base shelves front & rear.
- Transparent tool display cover available separately, please see Power-TEC Part No. 92188
