

Rear View Mirror Release Tool

This rear view mirror removal tool has been designed to enable the quick and easy removal of the entire mirror unit from the windscreen of various Ford, Vauxhall and Opel vehicles. The steel prongs are designed to push into the base of the bracket between the mirror and the windscreen, allowing for the mirror unit to be released from the mounting without causing any damage to either the mirror or the windscreen.

Additional Information

- For the fast removal of rear view mirrors without causing damage to the mirror, trim or windscreen.
- Applications include: Ford, Vauxhall & Opel models.
- Length: 205mm; width: 29mm; jaw width: 5.8mm.
- Release mirror by sliding the prongs upwards into the mirror bracket.
