

Hose Clamp Pliers - Axial Type Grip

Hose clamp removal pliers for use on ring type and flat band style spring loaded hose clamps and clips. Featuring a waffle design for improved grip, together with an axial type locking grip that allows for easy access to the hose clamp opening between tightly packed components in the engine bay whilst securely clamping it in the open position. The jaws are easy to adjust, through the use of a quick release button on the top of the pliers, and have a maximum opening of 65mm.

Additional Information

- Designed for use on a variety of ring type and flat band style spring loaded hose clamps & clips.
- Jaw capacity: 0 - 65mm. Length: 185mm.
- Lattice-shaped tooth design lets them grip the hose clamp in any position.
- Jaws manufactured from Chrome Molybdenum, with a carbon steel handle.
- Easy to adjust. Thumb release action for one-handed operation.
