

Truck ABS Ring Fitting Tool - for Volvo FM Series

Designed to accurately fit the ABS sensor ring in accordance with Volvo's instructions. It enables the ABS ring to be pressed into the hub evenly ensuring that it is correctly aligned and set to the correct depth to avoid inducing ABS system errors associated with incorrect fitment.

Additional Information

- Applications include: Volvo FM series trucks.
- Use in accordance with OEM instructions.
- Allows the ring to be accurately inserted into the back of the hub to the correct depth.
- For fitting the OEM sensor ring 9998558-3.
