

Cordless Soldering Repair Kit 15w

A 15w cordless soldering iron with inbuilt LED, making it ideal for use in dimly lit areas such as engine bays and vehicle interiors. It features a cone shaped soldering tip, is powered by 4 x AA batteries, has a run time of approximately 30 minutes, reaches it's working temperature in 7 seconds, and has a maximum operating temperature of 550°C. It also comes supplied with a 30w heat shrinking tip, which has a run time of 15 minutes and has a maximum operating temperature of 400°C. Suitable for use in the workshop and around the home and is ideal for automotive technicians, electricians, jewellers, modellers, hobbyists and DIY.
