

Fuel Line Disconnect Tool 8mm - for Ford

With ease-of-use and speed in mind, the Laser 8416 disconnect tool has been specially designed to fit Ford 8mm metal fuel line connectors. The Ford OEM tool consists of 3 separate components whereas the Laser tool is a semi-flexible, all metal tool that makes fitting to the connector easier and quicker.

Additional Information

- Applications include: Ford C-Max, Focus, Galaxy, Kuga, Mondeo, S-Max, Tourneo Connect and Transit.
- Engine applications include: 1L EcoBoost, 1.5L EcoBoost, 1.6L Duratec 16v Ti-VCT, 1.6L EcoBoost Sigma, 1.8, 2.0, 2.3 and 2.5L Duratec, 2.0L Duratorq Diesel and 2.0L EcoBlue diesel.
- Used to disconnect the metal fuel line connectors found on both petrol and diesel engines in the Ford range. Equivalent in operation to OEM 310-137 (8mm).
- Machined alloy connection inserts with spring steel handle.
- Made in Sheffield to a UK Registered Design. NOTE: always depressurise the fuel system before using this tool.
