

Brake Caliper Cleaning File Double Sided

Double sided cleaning file suitable for removing brake dust, corrosion and the build up of road dirt from brake calipers and carriers when replacing brake pads and discs. Extra slim style (10mm) especially useful on Japanese manufactured vehicles. Reverse blade doubles as a scraper for more stubborn residue. Non-slip handle with thumb pressure points. Flat 155mm parallel blade with diagonal coarse grooves to prevent clogging.

Additional Information

- Designed for the removal of brake dust & corrosion.
- Extra slim style - only 10mm.
- Flat 155mm parallel blade with diagonal coarse grooves to prevent clogging.
- Double sided for ease of use.
- Ideal for use on Japanese vehicles with narrow caliper carriers.
