

Air Palm Impact Wrench 1/2"D

A lightweight mini air impact wrench with a side mounted trigger and 360° rotating air inlet to reduce the chance of the airline twisting or kinking. It's compact size allows it to fit in the palm of the hand making it suitable for use in tight spaces such as in engine bays, under wheel arches and around brake calipers. It features 3 speeds, both in forward and reverse, and has a maximum torque of 540Nm.

Additional Information

- The small size makes it ideal for working in confined spaces; uses include front caliper bolts & difficult to access suspension mounting bolts. Excellent for use under wheel arches.
- Length: 88mm; maximum torque: 542Nm (400lb-ft).
- Free speed: 8,500rpm; Noise level: 90dB; Air consumption: 5.6cfm; 1/4" air inlet.
- Weight: 1.15kg.
- Side mounted trigger. Suitable for left & right handers. Features swivel connector with 360° rotation.
