

Curved Metal Wedge/Pry Tool

A curved metal pry bar tool, 176mm in length, suitable for gently easing apart push-fit plastic components and removing both interior and exterior trim. Manufactured from SCM440 steel with a high strength thin tip finishing off the slim radius taper end, allowing the tool to fit in tight gaps and separate parts with very little deflection.

Additional Information

- Ideal for use on plastic sumps, plastic cam covers, EV battery covers, access panels & badge removal.
- Length: 176mm.
- Slim radius taper end for easy access.
- High strength thin tip 0.55mm (0.0218").
- Manufactured from SCM440 steel for strength, with a satin finish.
