

Fuel Pump Cover Tool - Ford 2.0L Diesel EcoBlue

Designed to allow the user to remove the inspection cover for the fuel pump sprocket which in turn allows access to the fuel pump sprocket fixing bolt without removing the whole front engine cover on the Ford 2.0lt EcoBlue diesel engines. This allows the Laser 7324 fuel pump removal kit to be used with the front cover still in place thereby reducing cost in time and parts.

Additional Information

- Applications include: Ford Edge (from 2018), Focus (from 2018), Galaxy (2018 - 2021), Kuga (from 2019), Mondeo (2019 - 2021), Ranger (from 2019), S-Max (2018 - 2021), Transit (from 2016), Transit Custom (from 2016) & Tourneo Custom (from 2016).
- Engine applications include: all 2.0lt EcoBlue diesel engines.
- No need to remove the front cover when accessing the fuel pump sprocket to remove the fuel pump.
- Use with the fuel pump removal tool, Laser Part No. 7324.
- Suitable for use with the fuel pump sprocket cover, OEM JB3Q-6095-AA. Made in Sheffield.
