

Magnetic Adjustable Welding Corner Clamp

This magnetic welding holder allows for ferrous components to be held in place at a set angle during the welding process. It features an easy-to-read gauge, with a range of 20 to 200 degrees, and once set the angle can be locked using a 4mm hex key (included). Both the internal and external surfaces of the support are magnetic, allowing for it to be used both inside and outside the workpieces for ease of use.

Additional Information

- Adjustable welding support to allow for angles to be formed between workpieces.
- Size: 120 x 80 x 20mm. Range: 20° - 200°.
- Clear, easy-to-read gauge. Angles are set using a 4mm hex key (included).
- Both the inside & outside surfaces are magnetic, for increased practicality.
- Manufactured from steel & Polypropylene (PP) with Neodymium magnets.
