

Cable Tie Removal Tool

A pair of cable tie pliers designed for the safe removal of nylon cable ties without causing damage to surrounding components or bundled wires. They feature a pair of precision cut flat-bladed cutting jaws that enable them to fit neatly under the head of the tie, but away from the fastened wires. Suitable for use by mechanics, electricians, auto electricians and DIYers.

Additional Information

- Suitable for cutting & removing nylon cable ties.
- Overall length: 178mm.
- Allow for flush cutting, without causing damage to bundled wires etc. Features spring-loaded cushion grip handles, with locking function.
