

EV Service Preparation Pack

A set of standard safety equipment for workshops preparing to service EV's and PHEV's, consisting of all of the necessary items required when preparing to service a BEV or PHEV High Voltage Vehicle. Ensures that safety protocols are in place, and that basic safety checks can be carried out on the vehicle before service work commences. NOTE: Shut-down timer and voltage tester should be used in accordance with vehicle manufacturers shut-down procedures for the vehicle in question.
