

Bush Removal & Fitting Tool - for BMW Rear Differential

The late model F chassis BMW models have 3 mountings on the rear differential, 2 front and 1 rear. The 8860 is designed to allow for the safe removal and fitting of the front mounting bushes on the rear differential.

Additional Information

- Applications include: BMW 7 Series (2008 - 2015), 6 Series (2011 - 2018), 5 Series (2009 - 2017) & 5 Series (2010 - 2017).
- Equivalent to OEM 33 0 020, Use in accordance with OEM instructions; for differential rear bush see Laser Part No. 8857.
- Manufactured from carbon steel, with a Chrome Molybdenum force screw.
- NOTE: Not for use with impact tools. Always ensure the force screw is lubricated with clean molybdenum disulphide grease.
- For earlier E chassis BMW bushes, see Laser Part No. 8406.
