

Stainless Steel Bucket Set 3pc

A set of 3 stainless-steel buckets with 8 litre, 12 litre and 16 litre capacities. They each feature a spun-metal construction, meaning no seams to trap dirt and germs, unlike traditional metal buckets, making them more hygienic and easier to clean, and ideal for use in a wide range of environments including catering and medical. Manufactured from heavy-duty stainless steel the buckets have an excellent resistance to rust and corrosion, stains and chemicals, and are far stronger and easier to clean than plastic or galvanised buckets. They can also tolerate high temperatures, allowing them to be sterilised with heat, and as stainless steel does not absorb odours they are even suitable for brewing, storing pet food or for use as an ice bucket.

Additional Information
