

Skipper Unit c/w Post & Base - 6 Post Unit

Skipper's multifunctional, multi-surface, range of innovative and patent protected products, have been designed from the ground up for health and safety. The Skipper system is designed to be completely modular, to allow for any of the safety kits and individual components to be connected to each other, enabling you to tailor the safety barriers precisely to suit the workspaces requirements. This kit comprises of; six Skipper head units, which each feature a 9m (30ft) retractable yellow and black barrier tape, with a unique design which prevents the tape from sagging or twisting even when extended over large distances. Together with six Skipper heavy duty support posts and bases, which can simply be filled with water or sand for improved strength and stability, then the post is twist-locked into position. Ideal use for maintenance and inspection areas, up to 18 meters, in bus and coach depots, forming a large 162 square metres cordoned off area.

Additional Information

- Six post modular safety barrier solution, designed to cordon off up to 162 square metres.
- Contents: 6x head unit, 9 metre (30 ft) x 48mm width retractable barrier tape (yellow & black), Part No. 62253.
